

NAS TOA's High-Performance Alloy Welded Pipes

Highlights

As a member of the Nippon Yakin Group, NAS TOA manufactures welded pipes using plates and coils of stainless steel, Fe-Ni alloys, high-Ni alloys, and other materials referred to as high-performance alloys. Our products are widely used in chemical plants and other harsh environments where superior corrosion and heat resistance are required, earning high praise for their quality. In collaboration with the Nippon Yakin Group, NAS TOA can propose the most suitable materials, peripheral technologies related to welded pipes, and various technical reports in response to your requests and consultations. Please feel free to contact us.

Main Exhibits

- 1: Bright annealed pure Ni alloy welded tubes (NAS NW276, NAS 625, duplex stainless)
- 2: Ni alloy welded pipes (NAS NW276, NAS 800H, duplex stainless)
- 3: High-performance thick-wall welded pipes (NAS 36 and NAS 825)
- 4: Stainless and Ni alloy welded square pipes (SUS 304, NAS 36, NAS NW276, duplex stainless)
- 5: Super austenitic stainless NAS 355N hot wire welded joints
